Alexandria

v0.0.1

Clemens Koza

Abstract

Alexandria allows a single document to have multiple bibliographies.

Contents

I Introduction

This is a template for typst packages. It provides the process() function:

```typ
lib.typ
1  #let process(x) = {
2    cbor.decode(_p.process(cbor.encode(x)))
3  }
```

Here is the function in action:

```typ
1  one equals #alexandria.process("one")
```

one equals one

II Module reference

II.a `alexandria`

- process()

process(x: str) -> str

The identity function

```typ
1  #alexandria.process("hello")
```

hello

Parameters:

x (str) – some parameter
